Yes, there is a class of lenses called Megapixel. Arecont Vision offers a comprehensive line of lenses to cover a majority of megapixel applications. We also recommend lenses from well known companies, such as, Computar, Fujinon, Tamron or Pentax. <p>Auto-iris versus non Auto-Iris</p> <ul style="list-style-type: none"> o Arecont Vision's most popular cameras are manual iris cameras. All Arecont Vision cameras feature a CMOS sensor rather than a CCD sensor that is used in most Analog cameras.
